REPORT OF THE BOARD OF GENERAL DIRECTORS

The Board of Directors of VietNam Railway Construction Corporation Joint Stock Company submits this Report along with the Company's Financial Statements prepared for the fiscal period of Quarter I/2026 ending March 31, 2026.

BOARD OF DIRECTORS, BOARD OF GENERAL DIRECTORS AND AUDIT COMMITTEE

Members of the Board of Directors, Board of General Directors and Audit Committee who managed during the fiscal period ending March 31, 2026 and up to the date of this Report include:

Board of Directors

Mr Vu Duc Tien	Chairman of the board
Mr Nguyen Duy Kien	Vice Chairman of the board
Mr Mai Thanh Phuong	Board member
Mr Pham Hong Thang	Board member, Chairman of the audit committee
Mr Pham Ngoc Quoc Cuong	Board member, Audit committee member
Mr Nguyen Gia Long	Board member
Mr Vu Anh Minh	Board member

Board of Genneral Directors

Mr Vo Van Phuc	General Director
Mr Luu Xuan Thuy	Vice General Director
Ms Vu Thi Hai Yen	Vice General Director

Chief Accountant

Mr Le Phu Minh Duc	Chief Accountant (Appointment dated April 16, 2026)
--------------------	--

EVENTS AFTER THE FISCAL YEAR END DATE

The Board of General Directors affirms that. There are no other important events after the end of the fiscal year that have a material impact, requiring adjustment or disclosure in the Company's quarter I 2026 financial statements ending March 31, 2026.

RESPONSIBILITIES OF THE BOARD OF GENERAL DIRECTORS

- Select appropriate accounting policies and apply them consistently;
- Make judgments and estimates that are reasonable and prudent;
- Indicate whether appropriate accounting principles have been followed and whether there are any material deviations that should be disclosed and explained in the Financial Statements;
- Prepare the Financial Statements on a going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Board of General Directors confirms that the Company has complied with the above requirements in preparing and presenting the Financial Statements.

The Board of General Directors is responsible for ensuring that the accounting books are properly recorded to reasonably reflect the financial situation of the Company at any time and to ensure that the Financial Statements comply with Vietnamese Accounting Standards, the Vietnamese Corporate Accounting Regime and legal regulations related to the preparation and presentation of financial reports. In addition, the Board of General Directors is also responsible for ensuring the safety of the Company's assets and therefore taking appropriate measures to prevent and detect fraud and other irregularities.

OTHER COMMITMENTS

The Board of General Directors commits that the Company does not violate the obligation to disclose information as prescribed in Circular No. 96/2020/TT-BTC dated November 16, 2020 of the Ministry of Finance on guidelines for information disclosure on the stock market and comply with Decree No. 155/2020/ND-CP dated December 31, 2020 of the Government detailing the implementation of a number of articles of the Securities Law.

On behalf the Board of General Directors.

Vo Van Phuc

General Director

Ha Noi, May 04 2026

1. KEY FEATURES OF THE COMPANY'S OPERATIONS

Capital Ownership Structure

VietNam Railway Construction Corporation Joint Stock Company, previously known as the Railway Construction Company, was converted into a joint-stock company according to Decision No. 3745/QĐ-BGTVT dated December 7, 2004, by the Ministry of Transport. The Corporation operates under the Business Registration Certificate No. 0103008002 issued by the Hanoi Department of Planning and Investment, first granted on May 25, 2005. It was later updated to No. 3300101075 on the 16th change dated July 21, 2015, up to now the most recent change (25th time) was issued on September 19, 2025.

The Corporation's headquarters is located at: No. 33, Lang Ha Street, O Cho Dua Ward, HaNoi, VietNam.

The total charter capital of the Corporation is 320,647,490,000 VND, equivalent to 32,064,749 shares, with a nominal value of 10,000 VND per share.

Business areas: Construction, trade and services.

Business lines: The main activities of the Corporation are:

- Construction of other civil engineering works, including transportation, industrial, civil, and irrigation works.
- Construction of railway and road infrastructure.
- Specialized design activities.
- Wholesale of construction materials and equipment. This includes the import and export of construction materials.
- Wholesale of machinery, equipment, and other parts. This includes the import and export of materials, machinery, and equipment for the transportation industry, including railway-specific parts and accessories.
- Real estate business, including the ownership or lease of land rights.
- Current accommodation services, including the operation of guesthouses and hostels, as well as food and beverage services.
- Catering services and mobile food services.

Characteristics of operations during the period affecting the interim separate financial statements

During the period, alongside executing contracts carried over from the previous year, the

Corporation successfully signed several new contracts and commenced construction and acceptance of major new projects, such as: Package XL11 Quy Nhon - Chi Thanh, Package XL-VNT2-03 for upgrading and renovating the section from Km1241+990 to Km1314+930, among others. As a result, revenue from sales and service provision for this period increased significantly compared to the same period last year. Additionally, the absence of profit from the investment cooperation contract with Hanoi Technology Financial Investment Joint Stock Company, as recorded in the previous period, led to a sharp decline in financial income during this period. These primary factors resulted in a significant increase in revenue from sales and service provision; however, pre-tax profit decreased compared to the same period last year.

Corporate Structure

The Corporation has the following affiliated units:

Unit name	Address	Main business activities
Branch of VietNam Railway Construction Corporation Joint-Stock Company	No. 131 Thach Han, Thuan Hoa ward, Hue city, Thua Thien Hue province	Current accommodation service

Information about Subsidiaries, Joint Ventures, and Affiliates of the Corporation

For details, refer to Note 13.

2. Accounting Policies and Practices Applied at the Corporation

2.1 Accounting Period and Currency Used in Accounting

The Corporation's accounting year follows the calendar year, starting from January 1 and ending on December 31 of each year.

The currency used in accounting records is the Vietnamese Dong (VND).

2.2 Accounting Standards and Regulations Applied

Accounting Regulations Applied

The Company applies Circular No. 99/2025/TT-BTC issued by the Ministry of Finance on 27 October 2025 for the preparation and presentation of its financial statements. This Circular also introduces changes in the presentation of certain items in the Statement of Financial Position, the Statement of Profit or Loss, and the Statement of Cash Flows.

Statement of Compliance with Accounting Standards and Regulations

The Corporation has applied the Vietnamese Accounting Standards and the guidelines issued by the government. The interim separate financial statements have been prepared and presented in full compliance with the applicable regulations, including the relevant standards, circulars, and accounting practices currently in effect.

2.3 Basis of Presentation of Interim separate financial statements

The interim separate financial statements are presented based on the historical cost principle.

The interim separate financial statements of the Corporation are compiled by consolidating the financial statements of independent accounting units and the Corporation's office.

In the interim separate financial statements, intercompany transactions and balances related to assets, liabilities, and internal receivables and payables have been fully eliminated.

Users of these interim separate financial statements should consider them in conjunction with the consolidated financial statements of the Corporation and its subsidiaries for the accounting period ending September 30, 2025, to obtain sufficient information regarding the financial position, business performance, and cash flow of the Corporation and its subsidiaries.

2.4 Accounting Estimates

The preparation of the interim separate financial statements adheres to the Vietnamese Accounting Standards, the Vietnamese accounting regime for enterprises, and relevant legal provisions. This requires the Board of General Directors to make estimates and assumptions that affect the amounts related to liabilities, assets, and the presentation of potential liabilities and assets at the end of the accounting period, as well as the revenue and expense figures throughout the accounting period.

Key estimates and assumptions that significantly impact the interim separate financial statements include:

- Provision for doubtful debts;
- Provision for inventory write-downs;
- Estimated useful life of fixed assets;
- Allocation of prepaid expenses;
- Classification and provision for financial investments;
- Estimated corporate income tax.

These estimates and assumptions are regularly evaluated based on past experience and other factors, including future assumptions that significantly affect the interim separate financial statements of the Corporation and are considered reasonable by the Board of General Directors of the Corporation.

2.5 Cash and Cash Equivalents

Cash includes cash on hand and demand deposits with banks.

Cash equivalents are short-term investments with a maturity of no more than three months from the date of investment, highly liquid, easily convertible into a known amount of cash, and not subject to significant risks in conversion to cash.

2.6 Financial Investments

Investments in Subsidiaries

Investments in subsidiaries are initially recorded in the accounting books at cost. After initial recognition, the value of these investments is determined at cost less any provision for impairment.

Provision for impairment of investments in subsidiaries is made at the end of the year when the subsidiary incurs losses, based on the subsidiary's financial statements at the time the provision is made.

Investments in Other Entities

Investments in other entities include investments in equity instruments of entities over which the Corporation does not have control, joint control, or significant influence. The initial carrying value of these investments is determined at cost. After initial recognition, the value of these investments is determined at cost less any provision for impairment.

Provision for impairment of long-term investments with no significant influence over the investee is based on the financial statements of the investee at the time the provision is made.

2.7 Accounts Receivable

Accounts receivable are tracked in detail by the maturity period, the debtor, the currency of receivable, and other factors according to the management needs of the Corporation. Accounts receivable are classified as short-term or long-term in the separate financial statements based on the remaining maturity of receivables at the reporting date.

Provision for doubtful accounts is made for: Overdue receivables as per economic contracts, loan agreements, contractual commitments, or debt commitments; Receivables not yet due but deemed difficult to collect. In this context, the provision for overdue receivables is made based on the original repayment schedule of the sales contract, without considering any debt rescheduling between the parties. Receivables not yet due but where the debtor is in bankruptcy, liquidation, or other conditions indicating potential losses, are also considered for provision.

2.8 Inventory

Inventory is initially recognized at cost, which includes: purchase cost, processing cost, and other directly related costs incurred to bring the inventory to its location and condition at the time of initial recognition. After initial recognition, if the net realizable value of inventory is

lower than its cost, inventory is recognized at its net realizable value.

The net realizable value is estimated based on the selling price of the inventory less estimated costs to complete the product and estimated selling costs.

Inventory value is determined using the weighted average method.

Inventory is recorded using the periodic system.

The method for determining the value of unfinished goods at year-end: The cost of unfinished work is accumulated based on each incomplete project or unrecognized revenue, corresponding to the unfinished work at the end of the year.

Provision for inventory write-downs is made at year-end based on the difference between the cost of inventory and its net realizable value.

2.9 Fixed Assets

Tangible and intangible fixed assets are initially recognized at cost. During usage, tangible and intangible fixed assets are recorded at cost, accumulated depreciation, and carrying value.

Post-Initial Recognition

If additional costs incurred after initial recognition increase future economic benefits expected from the use of tangible fixed assets beyond the level originally estimated, these costs are capitalized as an additional cost of the tangible fixed assets.

Other costs incurred after the fixed assets are put into use, such as repairs, maintenance, and overhauls, are recorded in the separate income statement for the period the costs are incurred.

Depreciation

Depreciation of fixed assets is calculated using the straight-line method, with estimated useful lives as follows:

- Buildings and structures:	10-25 years
- Machinery and other equipment:	3-20 years
- Transportation vehicles:	6-10 years
- Management tools and equipment:	3-8 years
- Leasehold rights:	32 years
- Indefinite land use rights:	No depreciation
- Computer software:	10 years

2.10 Investment Property

Investment properties are initially recognized at cost.

For investment properties leased for operation, they are recognized at cost, accumulated depreciation, and carrying value. Depreciation is calculated using the straight-line method, with the estimated useful life as follows:

- Buildings and structures: 25 years

2.11 Construction in Progress

Construction in progress includes fixed assets under purchase and construction that have not been completed at the end of the accounting period and are recognized at cost. This cost includes construction, installation of machinery and equipment, and other direct costs.

2.12 Operating Lease

An operating lease is a type of lease for fixed assets where the majority of the risks and benefits associated with ownership belong to the lessor. Payments under an operating lease are recognized in the income statement using the straight-line method based on the lease term.

2.13 Prepaid Expenses

Expenses that have been incurred but will benefit multiple accounting periods are recorded as prepaid expenses and allocated to the income statement over the relevant periods.

For long-term prepaid expenses, the allocation is based on the nature and extent of each type of expense to select a reasonable method and allocation criterion.

Prepaid land expenses include advance land rent, as well as any expenses related to land use rights

that do not meet the conditions for recognition as intangible fixed assets under Circular No. 45/2013/TT-BTC, issued by the Ministry of Finance on April 25, 2013. These costs are recorded in the income statement using the straight-line method based on the lease term.

Tools and supplies, which are assets held for normal business activities with an acquisition cost below VND 30 million, do not qualify for fixed asset recognition. The cost of tools and supplies is amortized on a straight-line basis over 1 to 3 years.

Repair expenses are recorded at cost and amortized on a straight-line basis over 1 to 3 years.

Other prepaid expenses are recorded at cost and amortized over their useful life using the straight-line method for 1 to 3 years.

2.14 Accounts Payable

Accounts payable are monitored based on payment terms, payee, currency type, and other management factors. These payables are classified as short-term or long-term based on the remaining payment term at the reporting date.

2.15 Loans

Loans are monitored according to each borrower, loan agreement, and the repayment term of the loans.

2.16 Loan Costs

Loan costs are recognized as production and business expenses in the period they are incurred, except for loan costs directly related to the construction or production of assets under construction, which are capitalized into the asset's value when the conditions specified in Vietnamese Accounting Standard No. 16 "Loan Costs" are met. For loans used to construct fixed assets or investment properties, interest is capitalized even when the construction period is less than 12 months.

2.17 Accrued Expenses

Expenses incurred for goods or services received from suppliers but not yet paid for, as well as other payables such as interest on loans, are recognized as production and business expenses for the accounting period.

Accrued expenses are recognized in the income statement based on the matching principle, aligning revenues with the related costs in the same period. Differences between the accrued and actual expenses are adjusted.

2.18 Unearned Revenue

Unearned revenue includes amounts received in advance from customers for one or more accounting periods for leasing property. This amount is recognized as sales revenue and service income based on the amount corresponding to each accounting period.

2.19 Owner's Equity

The owner's equity is recognized based on the actual capital contributed by the owner.

The capital surplus reflects the difference between the par value, the direct costs related to the issuance of shares, and the issue price (including cases of re-issuance of treasury shares). It can be a positive surplus (if the issue price is higher than the par value and the direct costs related to the share issuance) or a negative surplus (if the issue price is lower than the par value and the direct costs related to the share issuance).

Undistributed after-tax profit reflects the business results (profit or loss) after corporate income tax and the status of profit distribution or loss treatment of the Corporation.

Dividends payable to shareholders are recognized as payables in the Corporation's balance sheet after the Board of General Directors' notification of the dividend distribution and the announcement of the dividend entitlement date by the Vietnam Securities Depository.

2.20 Revenue

Revenue is recognized when the Corporation is able to receive economic benefits that can be reliably determined. Revenue is determined based on the fair value of amounts received or receivable, after deducting trade discounts and sales reductions. The following specific conditions must also be met when recognizing revenue:

Revenue from the sale of goods:

- The majority of the risks and benefits associated with the ownership of the product or goods have been transferred to the buyer.
- The Corporation no longer retains control over the goods as the owner or controller.

Revenue from providing services:

- The portion of the work completed as of the balance sheet date can be determined.

Revenue from construction contracts:

Construction contracts stipulate that the contractor is paid based on the value of the work completed. When the completion results can be reliably determined and are confirmed by the customer, revenue and related costs are recognized in Rate to the work completed as confirmed by the customer, based on invoices issued.

Revenue from financial activities:

Revenue from interest, dividends, profits from equity interests, and other financial revenues is recognized when both of the following conditions are met:

- There is a probability of receiving economic benefits from the transaction.
- The revenue can be reliably determined.

Dividends and profits from investments are recognized when the Corporation has the right to receive dividends or profits from its investments.

2.21 Cost of Goods Sold and Services Provided

The cost of goods sold and services provided includes the total costs incurred for the finished products, goods, materials sold, and services provided to customers during the year. These costs are recognized in accordance with the revenue earned in the period, ensuring compliance with the prudence principle. Losses of materials or goods beyond the standard amount, costs exceeding normal standards, and inventory losses after deducting responsibility from the

related parties or individuals are fully and promptly recognized as part of the cost of goods sold in the period.

The Corporation applies the method for determining the cost of construction projects as per Notice No. 1378/TB/CTĐS dated December 4, 2009, issued by the General Director of the Railway Construction Corporation. Accordingly, the cumulative cost of construction projects is determined based on the ratio of cumulative net revenue (the value certified by the investor) to the total cumulative value of completed project output from the commencement of the project to the end of the accounting period. This ratio is applied to the total cumulative costs incurred for each project, where the total value of completed project output is determined based on the actual inventory of completed work volumes multiplied by the contract unit price. The cost of construction projects recognized during the period is calculated by subtracting the total costs recognized up to the prior reporting period from the cumulative costs determined using the aforementioned method.

2.22 Financial Costs

The costs recorded under financial costs include: borrowing costs, provisions for losses from investments in other units, etc., which are recorded as the total amount incurred in the period without offsetting against financial income.

2.24 Corporate Income Tax

Current Corporate Income Tax Expense

The current corporate income tax expense is determined based on taxable income for the period and the applicable corporate income tax rate for the current accounting period.

Corporate Income Tax Rate for the Current Year

In the accounting period ending December 31, 2025, the Corporation is subject to a corporate income tax rate of 20% for income from production and business activities subject to corporate income tax.

2.24 Related Parties

Parties are considered related if they have the ability to control or significantly influence the decisions of another party regarding financial policies and operations. The Corporation's related parties include:

- Enterprises directly or indirectly through one or more intermediaries that have the right to control the Corporation, are controlled by the Corporation, or share joint control with the Corporation, including the parent company, subsidiaries, and associates.
- Individuals who directly or indirectly hold voting rights in the Corporation and significantly influence the Corporation, key management personnel of the Corporation, and close family

members of these individuals.

- Enterprises controlled directly or indirectly by the individuals mentioned above through significant voting rights or influence.

In considering each relationship with related parties for the preparation and presentation of interim separate financial statements, the Corporation emphasizes the nature of the relationship rather than the legal form of these relationships.

2.25 Segment Information

In the period, the Corporation's primary business activities are construction and the supply of materials for construction in Vietnam. Therefore, the Corporation does not prepare segment reports by geographic area.
