**PRODUCTION AND BUSINESS RESULTS IN 2025  
PRODUCTION AND BUSINESS PLAN IN 2026**

(Report at the Annual General Meeting of Shareholders in 2026)

*Hanoi, June ,2026*

No.: 01/BC-Board of Directors

*Hanoi, June 2, 2026***REPORT**  
**PRODUCTION AND BUSINESS RESULTS IN 2025 AND**  
**PRODUCTION AND BUSINESS PLAN IN 2026**

- **Distinguished guests!**
- **Dear Shareholders!**

On behalf of the Board of Directors, I would like to report on the production and business results in 2025, the production and business plan in 2026 of Vietnam Railway Construction Corporation Joint Stock Company (hereinafter referred to as the Corporation or VRCC).

**Part One**  
**PRODUCTION AND BUSINESS RESULTS IN 2025****I. Production and business indicators:**

1. Total output value: 532,563 billion VND (reaching 55% of the plan)
2. Revenue: VND 654.7 billion (reaching 72.7% of the plan)
3. Profit before tax: VND 8.2 billion
4. Value of signing construction and installation contracts: 474.9 billion VND, of which:
  - The Corporation signed 04 new contracts, value: 359,9 billion VND
  - Member units signed 09 new contracts, value: 115 billion VND
5. Capital collection: 443 billion VND
6. Unpaid construction and installation volume as of 31/12/2025: 164,2 billion VND
7. Cash and cash equivalents as of 31/12/2025: VND 52,3 billion
8. Loans and financial lease debts as of December 31, 2025: VND 417.7 billion, of which:
  - Short-term debt: VND 416.3 billion
  - Long-term debt: VND 1.4 billion
9. Customer receivables as of December 31, 2025: VND 452.2 billion
10. Amounts payable to sellers on 31/12/2025: VND 251.4 billion
11. Solvency factor: 1.2 times
12. Payment to the State budget: 10.6 billion VND
13. Average income of employees: 12,822 million VND/person/month.  
Fully implement policies for employees.

**II. General assessment:**

In 2025, the results of production and business activities will not meet the Resolution of the General Meeting of Shareholders in 2025. The work of finding jobs and signing new contracts faces many difficulties due to the objective conditions of the construction market (the administrative merger leads to many projects having to be suspended or delayed, etc.) and from subjective factors

such as the organization of approaching customers is not extensive and effective enough, member units have not actively looked for jobs.

Although in 2025, the Party and the State also have important decisions, typically Resolution 68 to promote the private economy. In order to achieve double-digit growth of over 10%, the government is also constantly promoting investment in urban transport infrastructure, starting the component project 1 of the Hanoi - Lao Cai - Hai Phong route, but it has not yet been able to be implemented simultaneously, so construction and installation enterprises also face many difficulties. the Company's expressway bidding package works are constructed in the stage of completion and handover and put into use, so in 2025 the value of the Company's output and revenue will be low, and the set targets will not be completed as planned.

## **Part Two**

5. New investment in equipment: 30 billion VND
6. Average income of employees: 13.5 million VND/person/month
7. To fulfill all obligations to the State

#### **II. Administrative measures:**

In order to achieve the above-mentioned production and business targets, the Board of Directors of the Corporation focuses on implementing the following contents:

1. Recruit additional personnel, step up approaching, bidding and signing new contracts with high value and economic efficiency.
2. To coordinate with investors and relevant ministries and branches in arranging to record capital for completed works that have not yet been paid.
3. Focus on directing the fast construction of bidding packages XL01 of Duong Railway Bridge, XL Hoa Duong - Thanh Luyen Bidding Package, DT 488 overpass, Cho Moi - Bac Kan Expressway, Phu Tho Railway Station - under TP1 project of Hanoi - Lao Cai - Hai Phong route. 5. Continue to implement the group of solutions to improve the quality of corporate governance:

- Completing the system of regulations and legal documents of the Corporation. Formulate, amend and update to suit the current situation (Financial Regulation; Contract Regulations...)

**REPORT**  
**Operating results in 2025 and 2026 Operation Plan of  
the Board of Directors of the Corporation**

Dear Shareholders,

In 2025, the world economic environment will continue to be complicated with many intertwined risk factors. Global economic growth remained at a low average level; Prolonged tightening of monetary policy in major economies to control inflation has kept the cost of capital high. In addition, geopolitical conflicts continue to affect global supply chains, energy prices and construction materials have fluctuated sharply at times, putting pressure on the production costs of enterprises.

In Vietnam, 2025 will record many positive changes as the economy continues to recover and maintain macro stability. The Government promotes the disbursement of public investment, especially in the field of transport infrastructure, considering this as one of the main drivers of economic growth. Many key national transport projects have been implemented, including the North-South expressway, ring roads in Hanoi and Ho Chi Minh City, as well as projects to upgrade and renovate the existing railway system and prepare to invest in new railway lines.

For the traffic construction industry, 2025 has a number of outstanding features:

- The scale of public investment remains high, creating a significant source of jobs for construction and installation enterprises;
- Road projects continue to account for a large proportion, while the railway sector begins to show signs of restarting a new investment cycle;
- The level of competition in bidding has increased sharply, with the participation of many large domestic and foreign enterprises;
- Fluctuations in the price of construction materials, financial costs and credit conditions continue to be factors affecting the operational efficiency of enterprises.

In this context, the Corporation's activities are directly affected in many aspects:

(i) Regarding opportunities:

- Increased public investment capital helps expand the construction and installation market, especially in the field of roads;
- Railway projects are prepared for investment to create a premise for the Corporation to promote traditional advantages in the medium and long term;

(ii) Regarding challenges:

- Fierce competition in bidding reduces profit margins;
- Input cost pressures (materials, labor, finance) affect project efficiency;

- Access to credit capital and cash flow continues to be an issue that needs to be strictly controlled;

In the face of intertwined favorable factors and difficulties, the Board of Directors has proactively issued and implemented many important resolutions in 2025 to:

- Consolidate the entire administrative and executive apparatus;
- Restructuring the system of member units;
- Strengthening control over finance, cash flow and debt;
- Orientation of development strategies in accordance with the new context of the industry;
- Improve governance capacity in the direction of transparency, approaching the standards of listed companies.

The decisions of the Board of Directors in 2025 have contributed to stabilizing the Corporation's operations, gradually improving production and business efficiency and creating a foundation for the next stage of development.

## II. Board of Directors Operational Plan 2026

### 1. Business environment in 2026

In the period 2025–2026, geopolitical conflicts, especially in the Middle East and Ukraine, continue to be an important risk factor affecting the global economic environment. These developments are not only local but have a spillover impact on many key macroeconomic variables, specifically as follows:

The conflict in the Middle East – which accounts for a large share of global oil supply – increases the risk of supply disruptions, pushing oil and natural gas prices to fluctuate sharply. Fluctuations in energy prices lead to an increase in transportation costs and production costs of construction materials, affecting the cost of goods and profit margins of construction and installation enterprises.

Global inflation and monetary policy: rising energy and basic commodity prices cause inflationary pressure to return in many economies; Major central banks maintain prudent monetary policy, causing interest rates to remain higher than expected and the ability to loosen policy is limited, leading to increased capital costs, difficulty in accessing credit, and increased financial pressure on highly leveraged businesses.

International exchange rates and capital flows: geopolitical fluctuations increase the defensive sentiment of global investors; capital flows tend to shift to safe assets

(USD, gold), putting pressure on exchange rates in developing economies, fluctuating import costs.

Conflicts in the Middle East affect strategic shipping lanes (Red Sea, Strait of Hormuz, Suez Canal); Global logistics costs are increasing, transportation times are prolonged, leading to delays in the supply of materials, and increased transportation costs.

In 2026, the Government will continue to prioritize the allocation of large resources for the development of transport infrastructure, especially national key projects:

Road sector: continue to deploy the North-South expressway sections in phase 2; accelerate the progress of Ring Road 4 – Hanoi, Ring Road 3 – Ho Chi Minh City; implementing regional and inter-regional connectivity projects;

Railway sector: accelerate investment preparation for the North-South high-speed railway project; implement projects to upgrade existing railway lines, routes connecting seaports and industrial parks, prepare to invest in urban and inter-regional railways;

Investment trends: increasing non-budget capital mobilization (PPP, ODA); raising technical standards and higher requirements for contractors; promote the disbursement of public investment capital, shorten implementation procedures.

The year 2026 will open up many opportunities from the wave of investment in transport infrastructure, especially in the field of railways; However, it comes with increasing requirements for competitiveness and governance. The Board of Directors determined that this is an important period for the Corporation to strengthen its financial foundation, improve operational efficiency and prepare for a new growth cycle.
